Department Releases 2019 Year-End Public Safety Statistics 20-005

Violent crime continued to drop in San Francisco last year, according to data released today from the San Francisco Police Department's December 2019 CompStat Profile. Highlights from the year-end report include:

Homicides decreased 11 percent from 2018 and marked the lowest number of homicides in the city since 1961

Sex trafficking decreased by 57 percent

Rapes decreased by 15 percent

Robberies decreased by 4 percent

Aggravated assaults decreased 4 percent

Violent crime- SFPD's top priority- dropped 6 percent last year and the total number of victims injured or killed by gun violence decreased 1 percent. As part of its strategy to address such incidents, the department seized 933 firearms in 2019 and in October hosted its first Gun Violence Summit to identify comprehensive strategies to reduce gun violence in the Bayview district.

"We are constantly striving to reduce all forms of violence in our communities," said Police Chief William Scott. "We're doing this through our Crime Gun Investigations Center and by working closely with our community-based anti-violence partners to prevent shootings and advance justice for victims. Our success is contingent on all of us working together to make our city even safer."

Last year also saw a 4 percent overall drop in Part 1 Property Crimes in San Francisco:

Burglaries decreased by 14 percent

Vehicle burglaries decreased 2 percent

Larceny theft decreased 3 percent

As part of the department's commitment to crime deterrence, improved responsiveness and engagement with the public, SFPD this month is opening a new downtown foot beat office at 1100 Market Street. The location enables the department to strategically deploy foot beats throughout the Mid-Market corridor, support the deployment of other response teams throughout the downtown area and provide a place for the public to meet with officers. A 2018 study by the California Policy Lab and researchers at the University of California, Berkeley found SFPD's expanded foot patrol strategy led to a significant decrease in assaults and thefts.

"We know that our foot patrols discourage criminals, increase confidence in public safety and enable us to build strong, productive relationships with residents and merchants that are critical to help us solve problems and investigate crimes," said Chief Scott. "Day after day, our dedicated officers are working hard to protect our city and increase communication and trust with San Francisco communities. As we move forward in 2020, we'll continue to rise to the challenges of policing in our great city through smart strategies and our commitment to providing safety with respect to everyone we serve."

SFPD Issues Alert on Gold Scam 19-150

The San Francisco Police Department would like to alert the community about a scam that utilizes fake gold to swindle victims. In most instances, the suspects approach the victims in public and perform a fraudulent game or trick that involves sleight of hand or offer to sell the victim jewelry. The suspects typically place fake gold jewelry on the victim's neck, wrists, and/or hands. The victims then watch the suspects flee the scene in an awaiting vehicle. When the victims inspect the gold jewelry placed on them, they discover that their own jewelry has been removed and the remaining jewelry is fake.

The SFPD has documented approximately twenty such incidents in 2019 with a combined loss of about \$55,000. The victims have primarily been Asian community members in the Taraval and Richmond districts. SFPD is conducting investigations into these incidents and is working with outside agencies to identify suspects. This news release includes photos of some of the fake gold jewelry used in the crimes and a sketch of a suspect. Also included in this release are photos of a suspect, 44-year-old Mamfred Oinescu, who has a current arrest warrant for this series of crimes.

This scheme has been used to defraud victims throughout the Bay Area. SFPD is requesting the community to be vigilant in recognizing fraud and scams and report suspicious activity of this nature. If you have purchased gold items on the street from strangers, we recommend that you have them tested. If you believe you are a victim of this crime, please file a police report with your local police station. To find the police station that serves your neighborhood, visit [sanfranciscopolice.org/station-finder](https://www.sanfranciscopolice.org/station-finder).

Protect Your Vehicle Against Catalytic Converter Theft & Prius Hybrid Battery Theft

Thieves are looking for fuel-powered vehicles manufactured after 1974 that have catalytic converters. Thieves often target taller vehicles (such as pickup trucks or SUVs and now Prius) because they can easily fit under the vehicle to access the catalytic converter. The location of your car may also be a factor like regularly parking in one area for a long period of time. When possible, park in well-lit areas and close to building entrances. If you have a garage at your house, park your vehicle inside and keep the garage door close.

Have the catalytic converter welded to your car's frame, which may make it harder to steal.

Consider engraving your vehicle identification number (VIN) on the catalytic converter — this may help alert a scrap dealer that it was stolen and make it easier to identify the owner.

Calibrate your car's alarm to set off when it detects vibration.

Protect Your Vehicle from Car Theft

- Never leave your car running or the keys in the ignition when you're away from it, even for "just a minute."
- Always roll up the windows and lock the car, even if it's in front of your home.
- Never leave valuables in plain view, even if your car is locked. Put them in the trunk or at least out of sight.
- Remove portable electronic devices such as smart phones and GPS navigation systems, including suction cup or bean bag type mounts. (Even the visible appearance of a suction cup ring on the glass windshield can be an enticement to a thief to break in and look for the GPS system.)
- Park in busy, well-lighted area.
- Carry the registration and insurance card with you. Don't leave personal identification documents or credit cards in your vehicle.
- When you pay to park in a lot or garage, leave just the ignition or valet key with the attendant. Make sure no personal information is attached. Do the same when you take your car for repairs.
- Install a mechanical locking device — commonly called clubs, collars, or j-bars — that lock to the steering wheel, column, or brake to prevent the wheel from being turned more than a few degrees. Use it!
- Investigate in security systems. You may get a discount on your auto insurance.

Park Smart!

THE KEYS TO
PARKED CAR
SAFETY ARE IN
YOUR HANDS!

If you love it, don't leave it.

DON'T TEMPT A CAR THIEF!

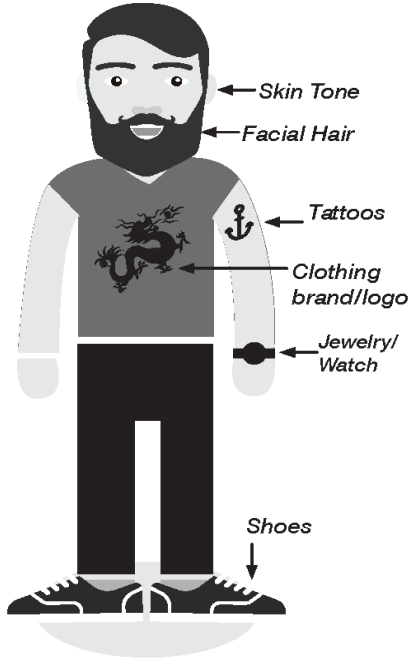

Car thieves only need seconds to break into your car. So Park Smart, and especially keep your trunk clear.

**Take everything
with you.**
